

oomph::GeneralisedElement

```
graph BT; A[oomph::DisplacementControlElement] --> B[oomph::GeneralisedElement];
```

The diagram illustrates a generalization relationship between two classes. The class 'oomph::GeneralisedElement' is shown in a dashed rectangular box at the top, representing a base or abstract class. The class 'oomph::DisplacementControlElement' is shown in a solid rectangular box at the bottom, representing a derived or concrete class. A vertical arrow points from the top of the 'oomph::DisplacementControlElement' box to the bottom of the 'oomph::GeneralisedElement' box, indicating that 'oomph::DisplacementControlElement' inherits from or specializes 'oomph::GeneralisedElement'.
