Chapter 1

Bugs and known problems

The library is under active development and we greatly appreciate any feedback from users. If you think you have discovered a bug, or have suggestions for improvement and other constructive criticism please contact the developers. Feel free to get in touch with us directly via

oomph-lib AT maths DOT man DOT ac DOT uk

or (preferably) use our GitHub-based bug tracking system, accessible online at

https://github.com/oomph-lib/oomph-lib/issues

where you will also find a list of bugs we are currently aware of, as well as bugs that have already been resolved since the release of the latest "official" version.

However, before reporting any bugs, **please** make sure you study the relevant documentation and the FAQs, which contain specific instructions on how to report bugs.
