Chapter 1

IGNORE THIS! Deliberately broken doc page for self-test

Here's a code inclusion that works:
`//===== start_of_namespace==============================================`

...and here's one that doesn't because I've deliberately broken the hook:

Here's a link that works

`Sommerfeld radiation condition`

and here's one that possibly doesn't because of an isolated "<a":

`Sommerfeld radiation condition`

Bla bla `click on this and you won't get anywhere because the link is broken!` bla bla.
